IN THE CLAIMS

Please amend the claims as follows:

Kindly cancel claims 5 and 6 without prejudice.

1. (Original) A method of improving the operation of a test strip, said method comprising the steps of:

flexing the test strip.

- 2. (Original) The method of claim 1 further comprising flexing the test strip so that it is positioned in multiple planes.
- 3. (Currently Amended) The method of claim 1 <u>further comprising the step of creating</u> wherein flexing the test strip creates pressure points at specific places on the test strip that enhances the function of the <u>test</u> strip.
- 4. (Currently Amended) An improved chemically-impregnated test strip, said test strip having micro-pores, the improvement comprising:

elongating the micro-pores thereby improving the capillary flow of any liquid that contacts the test strip, said elongating is made in the direction of the intended liquid flow.

5. (Cancelled)

- 6. (Cancelled)
- 7. (New) The improved test strip of claim 4 wherein the end of the test strip dipped into the liquid is tapered.
